

getBirthdayOfCurrentPatient

```
/**
 * Gets the birthday of the current patient and returns it as
 * a java.util.Calendar.
 *
 * @return:
 * The birthday of the current patient.
 */
function getBirthdayOfCurrentPatient () {
    /* ===== */
    // IMPORTS
    importPackage(java.util);

    var birthday = new GregorianCalendar();
    birthday.setTime(patient.getBirthDate());

    return birthday;
    /* ===== */
}
```
