Where are the server logfiles?

The GECAMed server, JBoss, writes his own logfiles which are located on the server computer where GECAMed is installed.

These can be found in the following directory if you used the default GECAMed installation path:

Platform	Property File Location
Windows	C:\gecamed\jboss-4.0.5.GA\server\default\log
Linux	/usr/local/jboss-4.0.5.GA/server/default/log
Mac OS X	/Applications/gecamed/jboss-4.0.5.GA/server/default/log
